

DECLARATION According to (EC) No 1935/2004

Customer: SAMPLE

Fabric Style: TW 661x Tx - Antistatic Polyester Fabric

Order number: SAMPLE **Order Confirmation:** SAMPLE

Date: --

We hereby declare that the a.m. polyester fabric is made from polyester yarns and stainless steel filaments. No foreign substances are intentionally added during weaving and finishing processes.

EU Regulation

Polyester is produced according to (EC) No 1935/2004, article 17. Only raw materials and additives as defined in EU 10/2011 have been used for the production of this product.

FDA

Based on the information received from our supplier, we declare polyester complies with the FDA Code of Federal Regulations, title 21, part.177.1630.

Stainless steel is generally recognized suitable for contact with food.

This declaration is valid for one year for the products as sold, even with reserve that different reactions and transfers could occur according to the final use.

We recommend to verify that the food contact suitability remains effective with respect to the applicable laws of the end user's country or where the product will be utilized, and according to the final use of the product itself. The buyer remains responsible for final product utilization. Fabric supplied is not washed and it is not sterile.
